

Harry Qi  
Letter of Intent for SGA President

To everyone at TouroCOM Middletown,

My name is Harry Qi and I am proposing my candidacy as your Student Government Association (SGA) President for 2018-2019. As your SGA President, I would aim to be professional, approachable, organized, and thoughtful while presenting your thoughts to administration and instituting the changes you feel are necessary here at TouroCOM Middletown. I believe that my past and current experiences make me well suited to be your President, which I have listed below:

1. I have significant managerial experience. Prior to medical school I was a Project Leader starting new scribe programs for a national scribe company. I have worked in eight hospitals and clinics across three states and Canada. I implemented standards and practices which the scribes I hired could use to make their jobs easier, more efficient, and rewarding. As such, I hope to use this experience to set the standard for service which SGA provides to students and cement a foundation on which they may rely.
2. I have been an active Class Representative. I have led the creation of best-practices for the Class Representative position which I hope will make us more accountable and useful to our classmates. I have also worked with the Curriculum Committee to create the Curriculum Feedback Form. I have striven to give voice to students so that we can establish meaningful change.
3. I work hard to contribute to the class. Along with posting notes and reviews which I hope is helpful to my classmates, I have also collaborated with other students to clean up our notes on our shared Dropbox. I am also active in other activities such as the Class of 2018 Yearbook Committee and helping organize Dr. Shah's BAPS Health-fair.

In short, I strongly believe my leadership experiences, work ethic, and proactivity give me the skills necessary to spearhead change here at TouroCOM. I intend to see greater transparency and organization on the part of SGA and the club system with greater community involvement in order to promote our students and our school.

Best,

Harry Qi, MSc.
